

SuperCAST

High Resolution Wax for Direct Investment Casting

Technical Datasheet

MSDS Available on Request

SuperCAST is our premium direct investment casting wax for precision casting applications such as jewelry & dental.

Offering excellent strength, build speed and resolution, SuperCAST is designed for direct-investment casting. Processing under a 12 hour burnout cycle, SuperCAST burns beautifully leaving no ash or residue.

Suitable for:
Jewelry Casting
Dental Casting

Supplied in 500mL Material Packs containing:

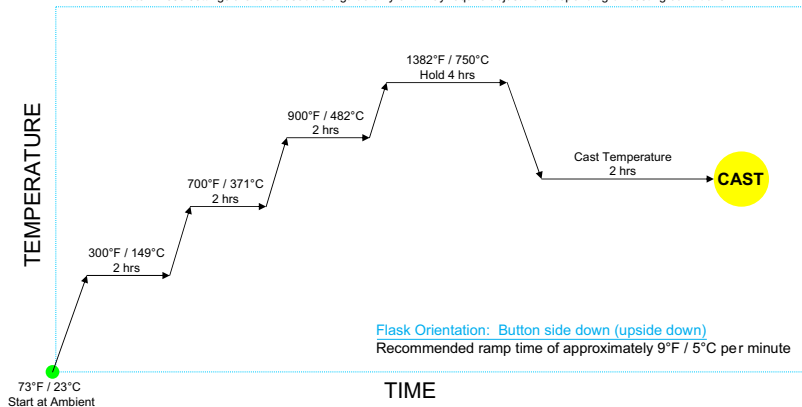

1x 500mL Bottle of SuperCAST Polymer

1x Build Tray

Note: This is the only on-going consumable for a Pico 3D Printer

Burnout Guide - Gypsum Bonded Investments

Note: These settings are to be used as a guide only and may require adjustment depending on casting conditions.

Asiga recommends:
Investment: Kerr Satin Cast 20 from Kerr
Flask Type: Perforated Flask
